CT Skill-up Seminar

Dates October **29** Thu. - October **31** Sat., 2015

Venue Kobe International Exhibition Hall 1, Exhibition Hall

Course Director Satoru Sumitsuji (Osaka University)

Course Co-Directors
Hidekazu Aoyama (Nagoya Tokushukai General Hospital)
Ryosuke Kametani (Nagoya Tokushukai General Hospital)
Tadashi Kuroda (Osaka Medical center for Cancer and Cardiovascular Diseases)
Masaaki Okutsu (Nozaki Tokushukai Hospital)
Yoshihiro Takeda (Osaka Medical College)
Keita Yamasaki (Osaka University)

Course Details:
Over the past decade Cardiac CT has advanced to an effective tool for assessing coronary artery disease. With the ability of evaluating (1) coronary plaques characteristics, (2) severity and extent of calcified coronary artery segments and (3) coronary arteries beyond chronic total occlusions, Cardiac CT still holds enormous potential as a PCI supporting tool. While PCI success rates can be further improved, integrated CT information helps to stratify procedural risk and reduce complications. For this purpose, however, analyzing Cardiac CT by the PCI operator himself is essential.
The present course aims to introduce the novel, user-friendly "Sliding Slab MIP" method, and to demonstrate how to take full advantage of Cardiac CT imaging in your daily PCI cases. Please join us to learn and experience the potential of cardiac MDCT.
Since there is a limited capacity of 12 attendees per session, it is highly recommended that you register as early as possible.

Side Menu:
We kindly invite you to bring your own case data in DICOM format (300-400 axial data set) for analysis during break time.

All sessions will be held in Japanese. However, English speaking assistant is available for all sessions.

Fundamental Course
The basic operation and diagnostic methods of "Sliding Slab MIP" will be explained.

Advanced Course
A seminar working with doctors who have already learned the basic operation of "Sliding Slab MIP".
Discussions will be made according to your own analysis of the practical cases.
