Course Objectives

Thank you for reading this message again this year. I am Yusuke Miyashita from Nagano Red Cross Hospital / Shinshu University Hospital, and I have been appointed as the CCT2026 Representative Peripheral Course Director.

The ongoing conflicts sparked by the two major powers continue to have an adverse impact on the field of interventional medicine worldwide. However, it is precisely in times like these that CCT Peripheral strives to remain a venue that provides inspiration and strength to all interventionalists. The CCT Peripheral Course Directors and Program Committee are developing plans fueled by passion, knowledge, and experience, and we promise that CCT2026 Peripheral will once again be the premier venue in Japan for the highest-quality peripheral interventions.

The history of CCT is the history of high-quality interventional medicine in Japan. We invite you to join us in Kobe to experience and be inspired by our Live Case Transmissions, which honor this legacy while introducing new innovations.

Yusuke Miyashita, M.D.

CCT2026 Representative Peripheral Course Director

EVT Live Case Transmissions

[Live Transmission Sites]

Thursday, October 29

Toyohashi Heart Center

Friday, October 30

Kyoto Katsura Hospital

As usual, the CCT Peripheral will hold a live course which focus on EVT. In this live course, we will introduce lesions in iliac, femoral, below-the-knee, renal, subclavian and carotid arteries. We look forward to your active participation to this exciting live course.

Peripheral Video Live (Young Generation) Scientific Program

- Atherectomy •Bailout •Basic (puncture, sheath, wire, finalize)
- Calcification •CLTI •Debate Session (including evidence)
- Evidence •EVUS •IVUS •Retrograde
- Thrombosis (Indigo, laser, percutaneous Fogarty)
