

Call for Abstracts & Cases

Submission Deadline | **June 14 Thu., 2018**

◆ Case Competition

◆ Best Intra-coronary imaging Competition (BIC)

Education requires the sharing of experiences. For this reason, CCT2018 is making a call for cases. The winners of "Best Case" and "BIC Best Case" award will receive an official commendation, a faculty invitation to CCT2019 and a supplementary prize.

◆ Poster Sessions

Among submitted abstracts, the outstanding abstract presenters will be invited to give oral presentations with PPT slides at the Digital Poster Session at CCT2018. The "Best Poster" award winner will be selected from presenters at the Digital Poster Session and receive an official commendation and a supplementary prize.

Submission guidelines and forms

Registration

Pre-registration Period | **June 1 Fri. – September 14 Fri., 2018**

Pre-registration (by September 14 Fri., 2018)

Medical	3 days	JPY 25,000
Co-medical	3 days	JPY 2,000
Industrial Professional	3 days	JPY 25,000

◆ After the pre-registration deadline, you can make online registration by on-site registration fee.

On-site Registration (from September 15 Sat., 2018)

Medical	3 days	JPY 35,000
	1 day	JPY 20,000
Medical(Intern)*	3 days	JPY 10,000
Co-medical	3 days	JPY 4,000
Industrial Professional	3 days	JPY 35,000

* Medical(Intern) is required to present certification showing they are currently in the internship (4 years period) after graduation from medical school. Failure to do this will be charged the on-site registration fee of Medical. Pre-registration is not required.

** A student can attend the live course free of charge. Please present your student ID or equivalent documents at the on-site registration desk. Pre-registration is not required.

As the CCT2018 Representative Coronary Course Director, I would like to deliver a message.

From last year, CCT has made a fresh start in a new organization under Dr. Etsuo Tsuchikane, the new chairman of the board of CCT Supervisory Directors. CCT, which was established in 2001, has been consistently focusing on PCI treatment for complex coronary artery lesion and “new challenge” has always been the theme to the present day. After 17 years, we believe that unchanged CCT spirit is summarized by the following two points. The first point is removal of secrecy in treatment. Recently, we sometimes are raised a question against the way of treatment during live transmission from the perspective of maintaining privacy and protecting personal information. However, CCT considers that revealing everything and providing an open discussion regarding the procedure such as the treatment during live transmission are the required attitude for medical staff nowadays. As the second point, never being satisfied with the present state, CCT has always been taking innovative attitude and tackling treatment motivated by a new idea. In recent years, treatment guidelines for various diseases have been offered. Although guidelines are useful in deciding basic treatment plans, they have an aspect of comparative evaluation of treatment methods established by existing results. Therefore, a novel treatment will never be produced by a treatment relied on the guidelines. The forerunners who founded CCT have been producing new devices and techniques through varieties of inventive treatment ideas and sharing the information to the world so far. Thanks to this, the number of attendees for CCT has been growing every year and recorded a large number of 5,416 in 2017. We very much appreciate your kind contribution. Especially, the number of medical doctors from overseas has been dramatically increasing recently. We take pride that activities of CCT are widely recognized and evaluated not only within Japan but also all over the world.

CCT2018 is the second year under the new organization. Last year, Dr. Tsuchikane stated “Change” as the theme of the meeting and the direction is also constant this year. We would like you to look forward the program of CCT2018 since we are going to plan it in order to achieve a variety of new theme including clinical use of the latest imaging modality and PPI in addition to application of PCI treatment to CTO or LMT lesion treatment strategies which has continuously been tackled by CCT.

As always, we are waiting for you in the beautiful autumnal Kobe this year.

Yasumi Igarashi
CCT2018 Representative Coronary Course Director

Key Program

Live Case Transmissions

- The Cardiovascular Institute Hospital • Higashi Takarazuka Satoh Hospital • Sakurabashi Watanabe Hospital
- Tokeidai Memorial Hospital • Toyohashi Heart Center

Coronary Theater

We strive to provide an incomparable live demonstration course that is more challenging and ambitious. Our expert operators will demonstrate outstanding techniques and strategies for complex cases. Please make a connection with the world-class techniques of master operators and get in touch with the spirit of PCI.

Themed Theater

We will focus on each complex lesion such as LMT, CTO, Bifurcation as well as EVT in this theater. Our operators will demonstrate some exciting approaches by outlining every aspects of strategy and procedural details from beginning to end without interruption. We are convinced that you can learn a variety of prominent techniques founded by CCT in this live course.

CCT Live Playback Session

In this exciting session, the CCT directors will analyze live cases through and through until they can draw a satisfactory conclusion of case treatment. It is a great opportunity for all attendees to know PCI masters' tips and tricks, and to learn and improve skill and knowledge of PCI, since attendees are also welcome to join the discussion.

Live Case Pre-discussion Session

We will discuss live case treatment and strategy of the day in this morning session. Chairs, commentators and attendees will examine cases together. Please join the session in order to get better understanding of case treatments in Live Case Transmissions.

Scientific Program

We will offer the state-of-the-art lectures on hot topics by top-level faculties from the world. We are going to provide the forefront and accurate information to participants through the session. We would like to say with confidence that these knowledge will be certainly useful in treating patients.

Topics to be discussed

- ACS
- Antegrade approach
- Assisted circulation
- Calcified lesion
- Complications
- CTO
- DCA
- DES
- Imaging
- LMT
- Tips & Tricks during PCI

Fellow Course

In this course, we will prepare lectures for young doctors to obtain proficiency from basic to advanced techniques through live sessions. We will select younger doctors who are active in the front lines of their respective fields to provide lectures so that the audience can exchange opinions with the lecturers interactively. We believe that this session will help to improve young doctors' skill. We look forward to your participation.

Topics

How to build up a career of CTO expert operator?
Retrograde approach
How to session (CTO, Physiology, Calcified lesion, OCT IVUS, Bifurcation)

International Joint Sessions

We will collaborate with notable meetings and societies to get to know what is around the globe.
